

Nursing Services

A/Prof Caroline Dowling works closely with experienced Urology Nurse Consultant, Simone Balson. Simone provides support for patients in many areas from supporting applications for government funding, learning self-catheterisation, following up results of surgery and other education and interventions. Caroline may suggest you see Simone. Some patients can access similar services at the Cabrini Continence Clinic (95081755) if that is more geographically appropriate. You may also indicate you would like some nursing support and contact with Simone can be arranged. There is no compulsion to use the services as suggested. Continence advice and potential other avenues of referral can be accessed via the Continence Foundation of Australia, 1800 33 00 66 is their Help Line and the website is www.continence.org.au.

Nursing services with Simone are billed at the following rates and do not attract a Medicare or private health fund rebate, apart from the Voiding Flow Rate assessment. You will be invoiced and can pay electronically or over the phone. Please note these are fee estimates for the education component and do not include equipment costs where applicable.

SWEP application review	\$75
